

They have a marvelous new series, the Mood. A great combination of the finest teak wood with ropes around the frame and very comfortable cushions. Tribu also just launched very comfortable cushions with foam where the water leaks/goes through, a great development in outdoor land.

Next mission: Kartell; founded in the late 50ties and one of the worlds leaders in plastics furniture, lights & accessories, based in Italy. They work with top line designers only, like Philippe Starck, Marcel Wanders & Patricia Urquiola, to name a few. Kartell is always good for a 1.000m2 booth displaying their new products by designer and it also showed drawings, proto-types, making off's and not only the consumer products in various colors, models & sizes.

It's great to see how the hands of various masters create our new toys. We loved Kartell's "O/K" from Rodolfo Dordoni, one sophisticated product easy to change into a outdoor sofa or sun lounger. The transparent but colored polycarbonate wheels are smashing!

One more brand to tell you about: Moroso from Italy; the globe's leader in creativity, originals, colors and shapes. Their new mind-blowing sofas, chairs and even carpets proved again their supremacy in our line of business.

Since a few years they cooperate with the fashion brand Diesel. An industrial feeling with the cool looks from Diesel combined with the luxury, comfort and sensation of Moroso's furniture experience. All products are from the hand of the Diesel design team. Wow!! Some of Diesel's design products will be part of DolfijnFM's new studio.

There was so much to see I even forgot to tell you about MDF Italia, B&B Italia Outdoor, Kettal, the Tuuci F1 Parasol, Royal Botania, Extremis, Driade, Dedon, Gandia Blasco, Vitra and so many more...
